

WHAT THIS IS

This is not a new invented direction — it's what's already live on the reserve-page system you showed me. I'm formalizing it as a third comparison option so you can put it side by side with Ink and Light and choose deliberately, rather than by default. The dark nav/footer and warm cream body already match our Ink Edition closely; the accent colour is the one confirmed difference.

PALETTE

#171411

Ink

Nav & footer — confirmed identical to Ink Edition.

#F6F1EA

Cream

Body ground — confirmed identical to our Ivory.

#C8A96E

Gold (verified)

CTA accent — confirmed by you. Paler than Brass; takes dark text, not white.

NEW PATTERN — STATUS BADGES (NOT JUST ONE ACCENT)

Where our system uses one signal colour for everything, this one codes status by colour — a real functional difference worth weighing on its own merits.

INCLUDED

AVAILABLE

BY ARRANGEMENT

AT LODGES

CTA BUTTON — VERIFIED CONTRAST RULE

START PLANNING / ENQUIRE

Dark ink text on the pale gold — the opposite of our Brass rule (white text), because this gold is light enough that white would wash out.

OTHER CONFIRMED COMPONENTS

- Tag-pills on lodge cards — pale fill, dark uppercase text, 2-3 per card
- Quick-facts booking sidebar on lodge pages — price, rating, four value props, sticky CTA
- Sticky in-page sub-nav on lodge pages (Overview / Gallery / Rooms / Experiences / Facilities / Best Time / Reviews)
- Month-by-month season grid (Jan-Dec, Low/Shoulder/Peak)
- Accreditation footer row + review counts by platform
